| ALLSYNC ANALOG STEEL DOUBLE-DIAL CLOCK INSTALLATION		
INSTRUCTION SHEET: INST-DDA-ASYNC	REVISION: # 1	EFFECTIVE: 11-27-2024

IMPORTANT: If the double-dial ring has not already been mounted, refer to the instructions provided in the double-dial ring kit for mounting the ring, then return to these instructions to mount the clocks.
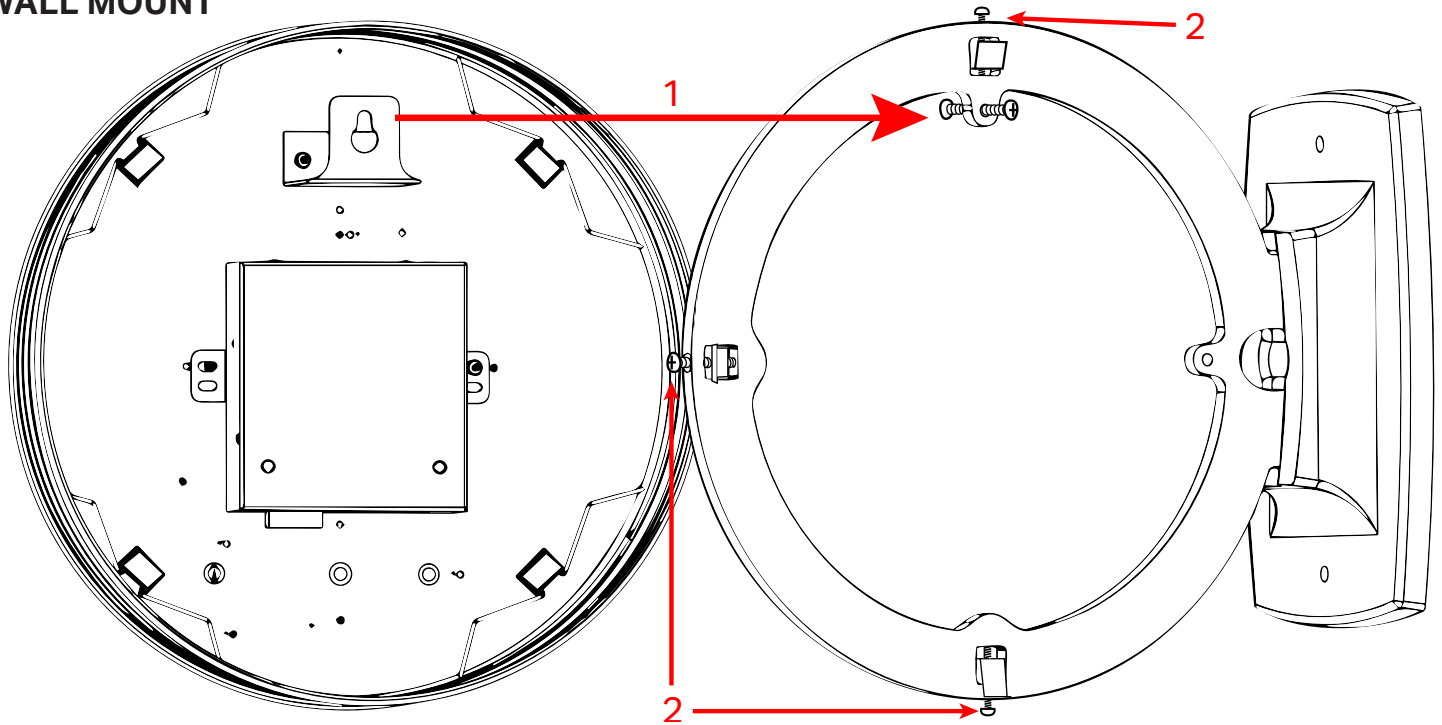

CONNECTING POWER

1. Connect the Molex plug from the clock to the Molex plug coming from the wall, making sure to observe proper orientation and wiring alignment.
2. Hang the clock on the screw on the mounting ring (see opposite page).
3. Repeat steps 1 and 2 for the second clock.

CLOCK INSTALLATION

1. Hang the clock on the mounting ring by placing the metal hanger on the back of the clock on one of the protruding screws on the mounting ring.

2. Once both clocks are placed on their respective screws, tighten the three mounting clips on the mounting ring to secure the clocks in place.
